

My Week at Swiss Cottage School, Development & Research Centre

First impression:

My first thought after looking around the school was WOW. I have never seen such a school , with so lovely and friendly stuff. I was impressed by seeing all the different rooms with their equipment it was just stunning.

First Day:

My first Day was great ! The Staff in the office was very friendly and nice. Immediately I liked them. I had always something to do and it wasn't boring at all because all my tasks were great and I was very curious how the other days will be like.

The Week:

My week here was pretty interesting. I had so much fun and I have learned so much. I got many different impressions in how the work here can be like.

Most interesting this week was when I learned something about virtual reality and how to work with it in different sessions. It was impressive and in my opinion pupil would love to use it in school.

Last day:

Sad and happy at the same time. That is how I felt on my last day. I was so happy that I got the opportunity to work here and learn many interesting things. I was sad because the week is over and my work experience too. I will miss it to work with them all together and thank them all for having me here.
